THE CHALLENGE

“What Can You Build Better with Us?”

In today's ever-changing technology environment, customers prefer quick and seamless interactions with their financial institute. Senior leaders at Wells Fargo are looking for a new product, service or application (the “Solution”) that will improve the overall customer experience (“Business Objective”). Based on your analysis of the data, what recommendations do you have for senior leaders at Wells Fargo?

There are two Challenges addressing the Business Objective. You may choose to respond to the Option A Challenge only or respond to the advanced analytics Challenge in Option B. You will be required to select prior to submitting your Solution whether you are responding to the Option A Challenge or the B Challenge. You may only submit one Solution of either type and cannot win in both Challenges.

OPTION A CHALLENGE – *Create the Blueprint:* Provide a written analytical report and a storyboard (“Analytic Plan”) that visually walks Senior Leaders through your idea, including what the interface with the customer would look like. If there is a triggering event, what would it be and what would the customer gain from the product, service or application.

OPTION B CHALLENGE – *Create the Blueprint and Build the House:* Provide Senior Leaders with a process flow with real code, demonstrating how the data is used, what algorithms are used, and the ultimate output.

A judging panel will select a total of seven winners - three from option A and four from Option B.

- (3) Option A winners will each win \$1,000.
- (4) Option B winners will each win \$2,000 and a 3-day/2-night trip to San Francisco, CA in March 2018 to attend a Wells Fargo Analytics Summit, and \$500 for travel expenses.
